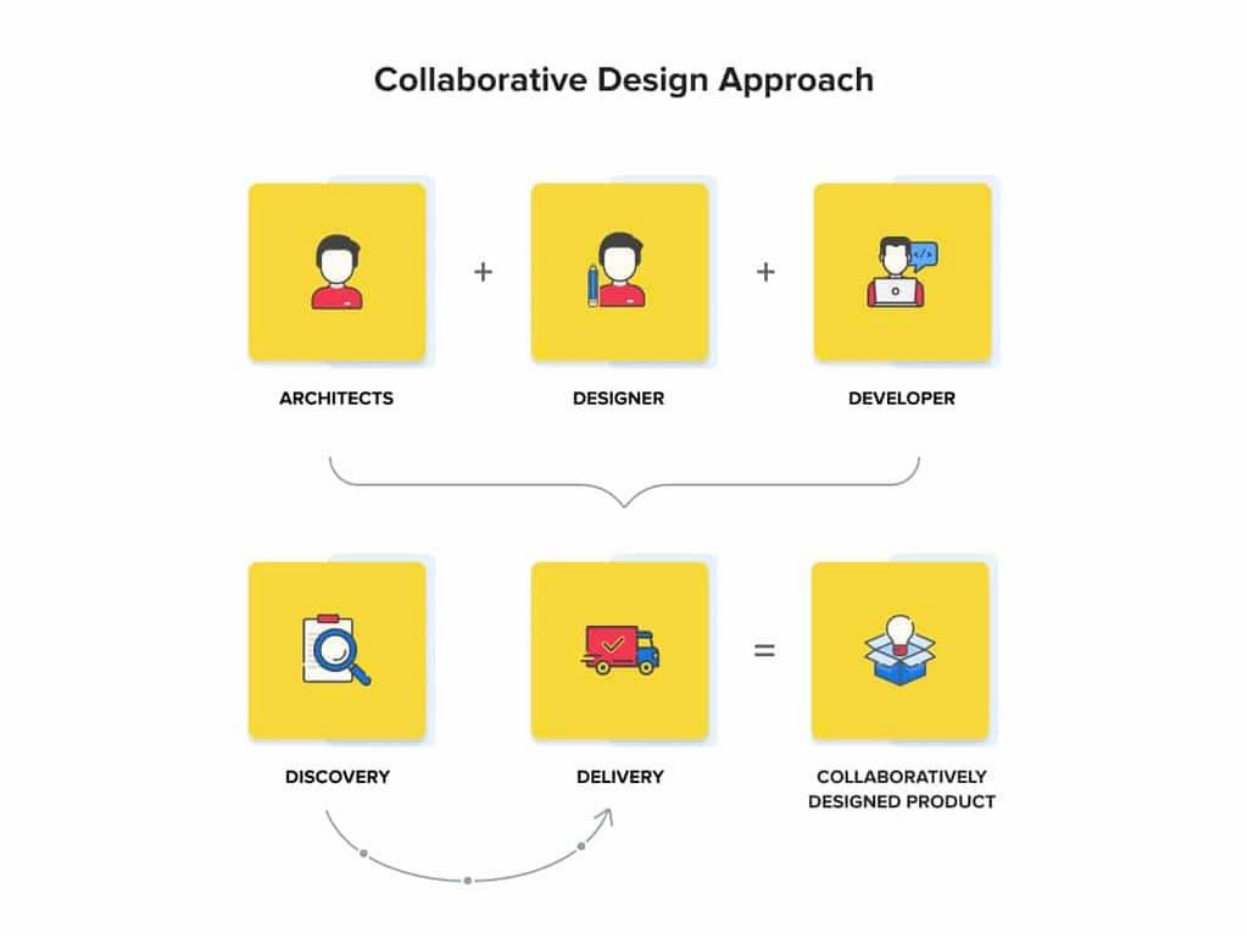
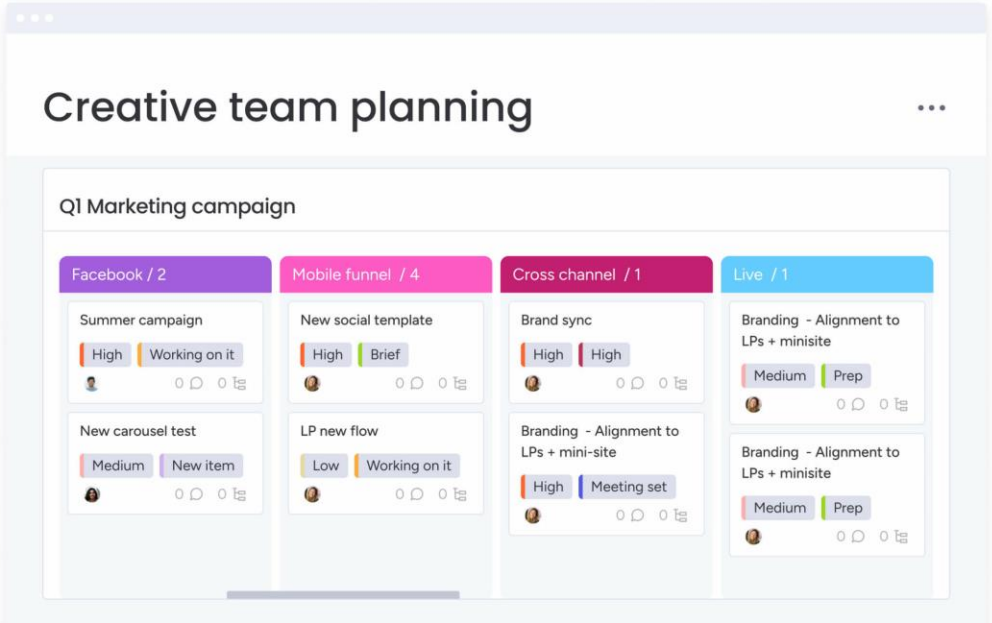
ENGALORAY TECH GROUP

Productivity, AI & Workflow Support





Purpose of This Resource

Great design is not only about creativity — it's also about **how efficiently designers work**, **how clearly they communicate**, and **how smartly they use technology**.

At **ENGLORAY Tech Group**, this resource ensures designers:

- Work faster without quality loss
- Communicate clearly with teams & clients
- Reduce revisions and confusion
- Use AI as a productivity booster, not a shortcut

This resource focuses on **speed, clarity, consistency, and scalability**.

1. Task & Project Management Systems

ClickUp / Trello

These tools help designers **organize work and manage deadlines**.

How Designers Use Them

- View assigned tasks
- Track deadlines
- Update work status
- Coordinate with team members

Why ENGLORAY Uses This

- Prevents missed deadlines
- Improves accountability
- Keeps everyone aligned

Designers always know **what to do, when to do it, and for whom**.

2. Documentation & Knowledge Management

Notion

Notion acts as a **central brain** for all design-related information.

Used For

- Design briefs
- Brand guidelines
- Client feedback history
- Process documentation
- Onboarding materials

Why This Matters

- No repeated questions
- Easy access to information
- Smooth handover between team members

3. Communication & Feedback Tools

Loom

Loom allows designers to **record screen videos with voice explanations**.

Used For

- Explaining design concepts
- Showing revisions
- Giving internal feedback
- Client presentations

Why ENGLORAY Uses Loom

- Reduces long messages
- Avoids miscommunication
- Saves time for both designers and clients

4. AI Tools for Smart Design Support

AI is used at ENGLORAY to **assist creativity and productivity**, not replace designers.

ChatGPT

Used For

- Caption writing
- Creative idea generation
- Concept explanations
- Client communication drafts

Benefit

- Saves thinking time

- Improves clarity
- Helps with creative blocks

Adobe Firefly

Used For

- Generative fills
- AI text effects
- Quick visual experiments

Why It's Valuable

- Faster creative exploration
- Integrated with Adobe tools
- Safe for commercial use

Midjourney

Used For

- Moodboards
- Concept references
- Visual inspiration

⚠️ *Important:*
AI outputs are **references only**, final designs are always human-crafted.

5. Workflow Discipline & Design Process

ENGLORAY follows a **clear design workflow**:

1. Client brief received
2. Research & reference collection

3. Concept development
4. Design execution
5. Internal review
6. Client review
7. Final delivery

Why This Workflow Matters

- Reduces rework
- Improves quality
- Keeps projects predictable

6. File Management, Version Control & Backup

Best Practices Followed

- Clear folder naming
- Version numbering (v1, v2, final)
- Cloud storage backups

Why ENGLORAY Enforces This

- Prevents file loss
- Avoids confusion
- Supports teamwork

7. Time Management & Productivity Habits

Designers are encouraged to:

- Break work into tasks
- Use time blocks
- Avoid multitasking
- Focus on quality over speed

Support Includes

- Realistic deadlines
- Clear priorities
- Balanced workload

Final Outcome

With **Productivity, AI & Workflow Support**, ENGLORAY designers can:

✓ Work efficiently and calmly
✓ Communicate clearly
✓ Reduce revisions
✓ Deliver on time
✓ Use AI smartly
✓ Maintain professional discipline
